The grade point average is then the total number of value point divided by the total number of credit units, For example, if a student scores A(72%), C(51%), B(69%), D(44%), and E(28%) in five subjects which carry 2,3,3,1, and 2 credit units respectively, his/her **Grade Point Average** will be worked out as follows;

Letter Grades	Credit Units	Numerical Grades	Value Points
A	2	4	8
C	3	2.5	7.5
B	3	3	9
D	1	2	2
E	2	0.5	1
Totals	11 T.C.U		27.5 T.V.P
G.P.A.	27.5		

$$11 = 2.50$$

iii. Cumulative Grade Point Average (CGPA)

The calculation of a grade point average made by student in two or more semester is referred to as the Student's Cumulative Grade Point Average. it is simply highlighted average. For example if a Student's scores for two semesters were as follows; **1st Semester.**

INFORMATION AND THE LACK OF IT

A normal Student without adequate information as to the environment in which he lives and operates will grovel like a blind man in the dark or even in a well-lit room.

In grovelling aimlessly and endlessly, he will inevitably commit blunders some serious and damaging: some pardonable and to be overlooked.

The first duty of a Student in an environment is to seek for information. Information helps in setting of bearing and goals of targets. Information helps in the executing of decision and the attainment of set goals.
